Subject: Cesarean section guideline update

Dear all

During our postnatal review meeting a week ago, we discovered that our Obstetric guidelines regarding requirement of neonatal colleagues attendance at caesarean section differs from the neonatal guidelines on the same. Where our guideline states that neonatal attendance is required for all known fetal anomalies, neonatal guideline is more specific in this regard. To have uniformity across the board, can I please request neonatal colleagues to nominate a member of staff to link in with Dr. [REDACTED] who is currently updating Cesarean section guideline.

Kind regards

[REDACTED]
