

Ref: FOIA Reference 2021/22-487

Date: 17<sup>th</sup> January 2022

Email [foi@uhnm.nhs.uk](mailto:foi@uhnm.nhs.uk)

Dear

I am writing to acknowledge receipt of your email dated 21st December 2021 requesting information under the Freedom of Information Act (2000) regarding injection-spiking.

As of 1<sup>st</sup> November 2014 University Hospitals of North Midlands NHS Trust (UHM) manages two hospital sites – Royal Stoke University Hospital, and County Hospital (Stafford). Therefore the response below is for the two sites combined from that date where appropriate.

**Q1 Please could you provide me with the number of A&E admissions relating to so-called “injection-spiking” in 2021, by month? Of these, how many patients had tests taken for toxicology and what were the outcomes? If possible, please can you break this down into types of test (e.g. blood/urine/hair), length of time since incident (“within 12hrs”, “within 24hrs” and “within 72hrs”), demographic of patient and type of drug found (if any).**

A1 There is no specific category on the Trust reporting system for injection spiking or drink spiking. Patients are treated on their presenting symptoms, therefore, if a patient was brought in unconscious, they would be booked in accordingly. No specific blood tests would be carried out to see if they had drugs in their system.

If a patient presented and said they have been spiked but didn't know what drug with, their symptoms would be managed accordingly. If they knew what actual drug they had been spiked with, then staff could look on Toxbase online for management guidance.

**Q2 Please could you provide me with the number of A&E admissions relating to so-called “drink-spiking” between Jan 2015 - Dec 2021? Of these, how many patients had tests taken for toxicology and what were the outcomes? If possible, please can you break this down into types of test (e.g. blood/urine/hair), length of time since incident (“within 12hrs”, “within 24hrs” and “within 72hrs”), demographic of patient and type of drug found (if any).**

A2 As answer 1

**Q3 Please could you provide me with the Trust's current policy at A&E for testing for reported or suspected “injection-spiking” in patients? If possible, please include information on whether tests are done, even when not clinically**

necessary e.g. for benefit of capturing the information / early evidence for police in case of subsequent reporting.

A3 There are no current policies

**Q4 Please could you provide me with the Trust's current policy at A&E for testing for reported or suspected "drink-spiking" in patients? If possible, please include information on whether tests are done, even when not clinically necessary e.g. for benefit of capturing the information / early evidence for police in case of subsequent reporting.**

A4 As answer 3

**Q5 Please could you tell me what funding, if any, the Trust has received (directly or indirectly) from the Home Office's Safety of Women at Night Fund (<https://www.gov.uk/government/news/millions-awarded-for-new-projects-to-keep-women-safe>)?**

A5 None
