

### YNP SCHEDULE – MEDICAL DIVISION

| WARD | 8am-9am | 9am-10am | 10am-11am | 11am-12pm | 12pm-1pm | 1pm-2pm | 2pm-3pm | COMMENTS                                                                                                                                                                                 |
|------|---------|----------|-----------|-----------|----------|---------|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 113  | X1      |          |           | X1        | L        |         | X1      | Female Bed. In the event of critical incident or hospital full Ward 113 can have female bedded overnight in bay 3                                                                        |
| 117  |         |          |           |           | U        |         |         | Can only have YNP when we are on Opel Level 4, Critical incident or hospital full.                                                                                                       |
| 120  | X1      |          | X1        |           | N        | X1      |         | Can have YNP on beds for bed space 11 and 12. In the event of critical incident or hospital full Ward 120 can use these bed spaces overnight. Gender is dependent on the ones in the bay |
| 121  | X1      |          | X1        |           | C        | X1      |         | Can have YNP on chair, gender is dependent on the ones in the bay                                                                                                                        |
| 122  | X1      |          | X1        |           | H        |         | X1      | Can have YNP on chair, gender is dependent on the ones in the bay                                                                                                                        |
| 123  | X1      |          |           | X1        |          | X1      |         | Can have YNP on chair, gender is dependent on the ones in the bay                                                                                                                        |
| 124  |         |          |           |           |          |         |         | Will pull own demand and utilise flexi bed capacity. Will be reviewed every bed meeting                                                                                                  |
| 222  | X1      |          |           |           | B        |         |         | Ideally no YNP due to specialist demand however this can be assessed on a daily basis. Aim to have 1 protected NIV capacity at all times                                                 |
| 230  | X1      |          |           | X1        | R        | X1      |         | Can have YNP on chair only. Bedded patient not an option                                                                                                                                 |
| AMRA | X1      |          |           | X1        | E        |         | X1      | Can have YNP on bed/chair                                                                                                                                                                |
| FEAU | X1      |          |           | X1        | A        |         | X1      | Can have YNP on bed/chair                                                                                                                                                                |
| SSU  | X1      |          | X1        |           | K        | X1      |         | Can have YNP on chair                                                                                                                                                                    |
| AMU  |         |          |           |           |          |         |         | In the event of hospital full or critical incident the holding area can bed 2 patients overnight                                                                                         |
| 76a  |         |          |           |           |          |         |         | Remains plus 1 at all times. Will pull a plus 2 against potential/definite discharge, male only                                                                                          |
| 76b  |         |          |           |           |          |         |         | Remains plus 1 at all times. Will pull a plus 2 against potential/definite discharge, female only                                                                                        |
| 78   |         |          |           |           |          |         |         | Remains plus 1 at all times. Will pull a plus 2 against potential/definite discharge, gender is dependent on the ones in the bay                                                         |
| 79   |         |          |           |           |          |         |         | Remains plus 1 at all times. Will pull a plus 2 against potential/definite discharge, female only                                                                                        |
| 81   |         |          |           |           |          |         |         | Remains plus 1 at all times. Will pull a plus 2 against potential/definite discharge, gender is dependent on the ones in the bay                                                         |

- If Portals are unable to identify suitable patients to sit out as YNP, Wards are to identify patients who can safely sit out to accommodate their YNPS.
