Neurophysiology Department

Coming to outpatients

**PROUD
TO
CARE**

Please come to the hospital entrance.

Please bring a list of any medicines you take.

Bring some money for parking and drinks or snacks.

Please book in using the check-in screens.

Ask for help if needed.

When you arrive in the department please book in at the reception desk....

And wait here until you are called for the test.

You will be collected by a member of staff.

You can decide not to have the test at any time.

Your test will be done in a room like this.

You will be asked questions about your health.

Here are the things we will use in the test.

Your head will be measured with a tape and marked with a soft pencil.

We will stick small disks to your head with cold paste.
It will not hurt.

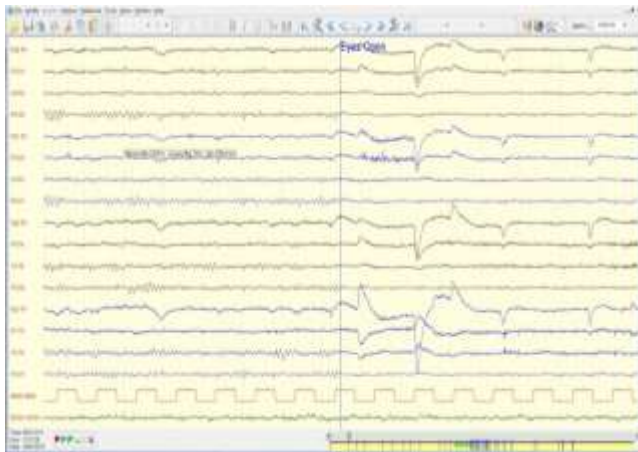

Two leads will be put on your wrists so we can see your heart beat.

We will ask you to lie on the bed and we will hook up the leads to a brain wave machine.

Please stay still.

The test will take 20 minutes.

This is what we see when we record.

We may ask you to do some deep breathing for

We will show you how. You can ask to stop if you feel unwell.

We will take care of you.

We will ask you to look at a flashing light.

You can ask us to stop the light if you feel unwell.

We will take care of you.

When the test is over we will take the leads and paste off your head....

And clean it with some warm water and cotton wool.

You will need to wash your hair with shampoo when you go home.

The results will be sent to your hospital doctor in about two weeks.
