

Can your patient hear you?

It is vital that patients understand their health conditions and can give informed consent to treatments. If you have a patient who appears not to be able to hear, or who usually has hearing aids but they have been lost /delayed, then you can access these communicator devices for loan through the Hearing and Balance department.

Please contact: audiologydepartment.nhs@nhs.net and type 'communicate' in the subject box

Alternatively, if you wish to purchase your own, they can be cleaned and reused. You can also purchase changeable ear inserts to comply with infection prevention. Further information can be found here: www.connevans.co.uk/product/8088186/91ACOM3/Communicator-amplifier-for-hard-of-hearing-people
